Portfolio

Keller Williams Realty

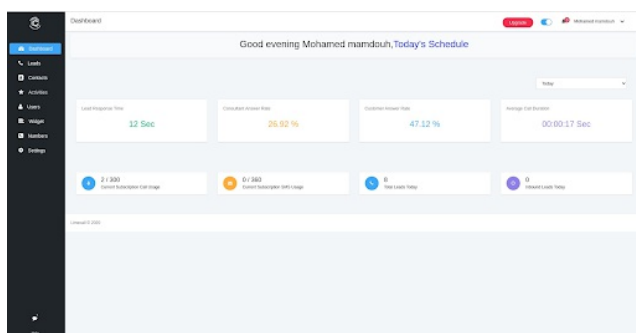

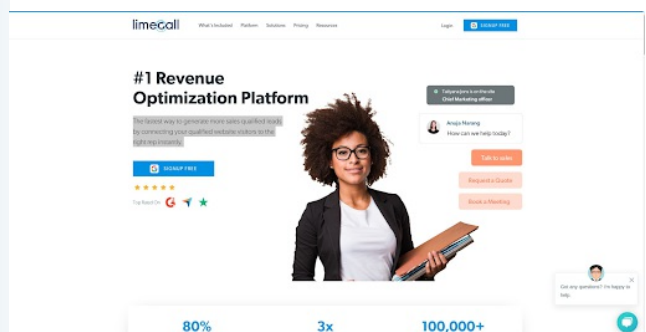

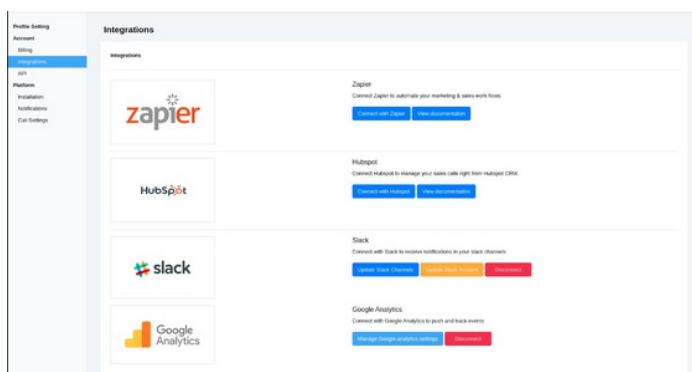

December 2018 - April 2020

Website: <https://www.kw.com/>

Contributing to an international remote team by developing and maintaining a web platform kwconnect.com which is a training, QA, resources, event management and social network for international real estate franchises and agents in United States and Canada. 150K+ users are using it. The platform is being revolutionized into various microservices.

Technologies used:

PHP, MongoDB, MySQL, Laravel, React

VOIP SAAS Application

July 2018 - March 2021

Website: <https://limecall.com/>

Limecall SAAS application for generate more sales qualified leads and calls

from your website visitors with targeted automation and real-time multi channel integrations.

I was the one who started this project as I started it 2.5 years ago then we started to bring more developers until we became 8 developers managed by me.

So my duties here was almost to keep everything stable not just the code, communicating between team

members, review the Pull Requests, Merge them, and finally Manage the deployments to Live.

As we started small I was doing the comparative analysis to bring more ideas to the app and implement it,

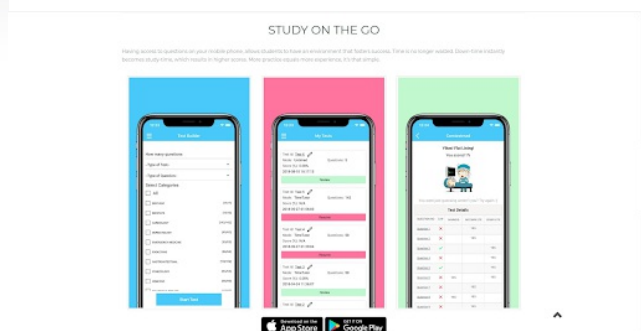

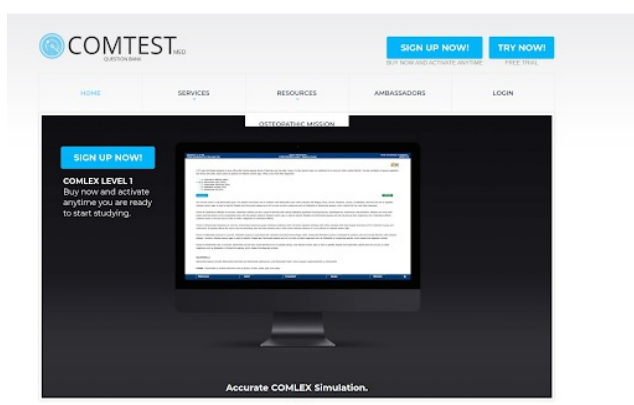

My goal there was to release this application and maintain it in addition to co-coordinating with the teams.

We reached with the project to Stable milestone and the team is still there continuing it, the Client already

passed the first phase (launching and teasing for the app) and the app started to have real clients and real payments.

Technologies used:

PHP, Laravel, React, MySQL, Javascript

COMTESTMED

January 2016 - July 2018

Website: <https://comtestmed.com/>

Working a small remote team working on multiple projects running related to MED Which is learning platform for medical students Like Comtestmed and Usmlebank.

Technologies used:

PHP, MySQL, Javascript
