Curriculum vitae

Personal data

Name: Sergey U.

Technical Knowledge and Skills

React, D3.js, Node.js, HTML, CSS

Sergey is a professional Full-stack JavaScript developer from Saint-Petersburg, Russia. Since 2014 he has been building modern web apps using JavaScript technologies for clients from all over the world. He has a lot of experience in front-end development with React and Redux as well as with Node.js/Express on the back-end side. He can create complicated visualization tools using D3 and highcharts, solving performance issues, reaching maximum speed and scalability. He likes working on large and challenging projects, creating app architecture and writing non-trivial business logic. He always provides clean and efficient JavaScript code. He uses TDD approach and Typescript.
