## Portfolio

## Passfolio/Portfolio January 2021 - February 2022

I worked on this team as a front-end developer using React. The team size consisted of 4 front end engineers for web, 4 for mobile and 4 server engineers. I worked on the company's web features, built components, implemented the company's banking features, tested and refined software with the team lead prior to rollout. Collaborated with other front end engineers, UI/UX designers and server engineers to create easily accessible web experiences.

Technologies used:  
React

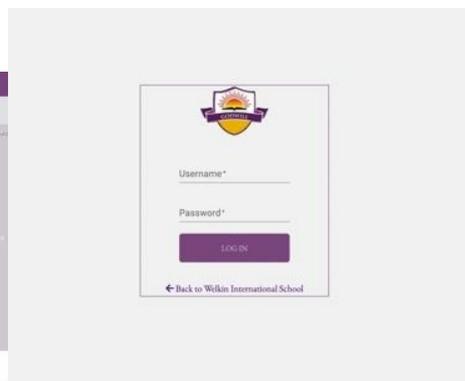

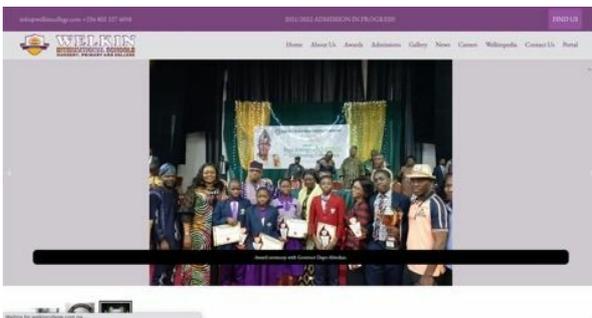

Product	Description	Quantity	Price	Remove
	Brown Cowboy	<>	35	×

TOTAL: \$70

## Crwn Commerce/ E-Commerce July 2020 - September 2020

I worked as one of the front-end developers on this project, I was also involved in implementing user authentication. We were 3 front end engineers on the team and 1 Fullstack engineer. As a frontend engineer, we made sure users were able to surf through a wide array of items, add items to cart and then checkout and pay seamlessly.

Technologies used:  
React, Javascript

## School Management/Education January 2017 - March 2020

Welkin International School is one of the most popular schools in Ogun state, Nigeria. I worked there as a full-stack web developer and it was at my time there that I built their school website and their admin dashboard. As a Fullstack developer, on the backend, I designed and implemented the admin authentication, admin dashboard to communicate with the database. On the front end, I designed the user facing components and the admin dashboard.

Technologies used:

React, Node.js
