

Curriculum vitae

Personal data

Name: Grigor A.

Technical Knowledge and Skills

Angular, Node.js, MySQL

Grigor is a Full-stack developer using Angular on frontend and Node.js / PHP on the backend with mobile (hybrid) application building skills.

He has started his path with C++, then he moved to another, more popular branch of development - web. After some time he started working with NodeJS (Express), Angular 4/5 and migrated to Ionic Framework 3 on mobile apps. Grigor became a team leader in a small startup.

His strong sides are finding/fixing bugs and project management including communication with the client.

He is well aware of TDD (Test Driven Development) and PPP (Pseudocode Programming Process).

Grigor is a big fan of Agile development practice.
