Portfolio

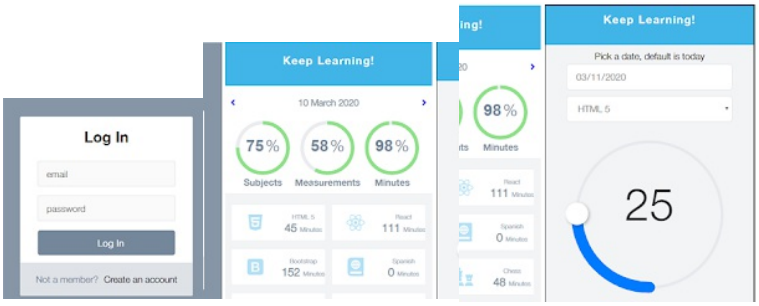

Web Development / Sports

May 2020 - August 2021

Description: Sports has always been one of the most wealthy sectors and the communication of the data on time is one of the key points to the fans and enthusiasts.
Role: I worked extensively on the data process and display on the website as a Full-Stack developer on a team with other 3 developers, one designer, a team lead and the CEO.
We Successfully launched a new version of two websites, with a base of Figma designs I Revamped marketing and sports website renewing code, design and updating frameworks and dependencies

Technologies used:
PHP, Laravel, MySQL, Vue.js, Javascript

Full-stack project / Education

January 2020 - March 2020

Description: Learning is a process that never ends. Today in the globalized world, studying is a daily matter; even doctors and programmers need to stay up to date, and whether you want to maintain your knowledge or just want to learn a new language, studying is something that you should never stop doing.
Role: During taking an update course I was required to create a project to finish and show mastery. The project I created was a learning tracker app with a simple format but complete data storage. This app helps you maintain motivation and track your progress every day.

Technologies used:
React, React Native, HTML

Website development / Fintech

January 2019 - December 2019

Description: A customer in fintech required a platform to give his visitors an easy way to choose a loan provider.
Role: I created a website with all the information they needed to make that decision. For my customer an easy way to update and upload providers to the platform and for his customers a friendly and simple page, I also set a blog for my customers to attract more visitors and improve the ranking of the website.

Technologies used:
Laravel, React
