Curriculum vitae

Personal data

Name: Vladimir S.

Technical Knowledge and Skills

Javascript, React, CSS, HTML

Vladimir is a Front-end end developer with more than 8 years of experience. During his career, he worked with websites and applications of varying complexity, from small promo pages, large online stores to electronic trading platforms of federal importance and well-known information agencies in the banking services field. He is constantly developing in the Front-end and is learning the most relevant techniques to put them into practice. He also has experience of working in large teams.
