WEB DEVELOPERS YOU CAN TRUST
Hire a web development professional
WHO WE ARE

- Soshace is a young and dynamic company with headquarters in Saint-Petersburg, Russia. We are the platform that connects global remote talent with awesome projects from all over the world.

  We are a community of pre-screened professionals.

- We provide qualified remote software developers to companies worldwide. Our developers come from Eastern and Western Europe, the Americas, and Asia.

  Since 2015, our developers have implemented a multitude of projects for our clients.

- Our values are the driving force behind everything we do. We have become a reliable and permanent source of highly qualified IT-specialists for many clients.
OUR STACK IS:

- **JavaScript**
  (Node.js, React.js, Angular, Vue.js, Meteor, and more)

- **Python**
  (Django, Flask, Scrapy, and more)

- **Java**
  (Spring and many more)
OUR DEVELOPERS SELECTION

- At the moment we have more than 80 developers in our pool: https://soshace.com/developers

- The developers on our platform are hand-picked — Soshace approves only 1% of the applicants after a series of tests.

- There are 5 steps of the selection process:
  1. CV review
  2. Background check and review of feedback from previous clients
  3. English language skill test
  4. Online programming test
  5. Final technical interview with the CTO and a live-coding session
You can check our clients' feedback here: https://clutch.co/profile/soshace

We also offer 40 hours of risk-free trial period so you can make sure you have hired the right developer.

You won't have to pay a penny in case you are not satisfied with their performance during the test week.

Yes, we are *that* confident in our developers.
The rates of our developers vary from $35 to $50 per hour and depend on their experience, skills, test results, education, and location.

Soshace issues a fixed fee which is already included into the final fee proposed to the client.

We take care of all paperwork and payments.
PAYMENT GUARANTEE FOR DEVELOPERS

- We guarantee our developers that their services will be fully paid for — in case the customer, whatever the reason may be, refuses to pay.

TYPES OF PROJECTS

- Our developers are looking for a:
  - full-time (40 hours/week) and
  - long-term (3+ months) commitment.

This is an important criterion as a developer who works long-term has enough time to thoroughly familiarize themselves with the project — and share their feedback and experience with other team members.
DEVELOPERS

Vitalii Zhukov

Full-Stack Developer

For the last six years, Vitalii has been professionally working in web development and using JavaScript, as the main language for writing apps, and popular frameworks like React, D3, Meteor, Express.js, etc. He likes big and complex projects where he can learn something new and work with high-class professionals. He is also a perfect contractor who can develop your project on his own. With Vitalii, you can always expect clear communication and high-quality code.
